Supply Chain Manager (100%)

To strengthen our Finished Product Business Unit in Schaffhausen, we are looking for a **Supply Chain Manager** as of now.

## Company Overview

AZAD is a privately held Swiss company that develops and markets

- generic Finished Products (FPs), principally ophthalmics and parenterals
- generic Active Pharmaceutical Ingredients (APIs).

As a virtual company, we use EU & FDA approved CDMOs to develop and manufacture FPs and APIs to out-license and sell to the global generic market.

## Your task

As Supply Chain Manager you will lead and execute all supply chain and logistic activities of FPs that are already commercialized or which are entering the launch phase.

## Your responsibilities

- Day-to-day contact with both the customers (marketing authorization holders) and CDMOs for forecasting, planning and inventory management to ensure timely delivery
- Purchase of required APIs to be shipped to CDMOs
- Customer's order processing including coordination of shipments with logistic companies
- Identification of solutions for day-to-day customer queries that arise, using both internal (Quality, Regulatory, BD) and external (CDMO) support
- Periodic reporting to management

## Your profile

- Experience in supply planning and logistics, ideally of FPs
- In depth knowledge of European/global GDP regulations
- Strong communication and organizational skills to facilitate good relationships with international customers and CDMOs
- Business oriented and highly motivated to serve customers to achieve their delivery terms
- Strong personality to manage CDMOs to meet our requests
- Ability to take responsibility and to make decisions
- Flexible to travel and visit CDMOs (2-3 times per year)
- Teamplayer
- Fluent in English (written and oral), with a high standard of German
